Introduction to Translational Science

Translating Basic Research into Research
for Humans

Translating Research to Patients

Translating Research to Communities

Translating Research to Healthcare Policy

Aug 29, 2026

Pedro Lamounier Sampaio

has successfully completed the online Specialization

Translational Science

Translational science is the process of turning observations in the laboratory, clinic, and community into interventions that improve the health of individuals and populations. Learners will acquire an introductory level of knowledge of the phases of translational science and how they relate to clinical and translational research. Learners will hear from Dr. Vicki Ellingrod, Associate Dean for Research and Graduate Education at the College of Pharmacy at the University of Michigan, and her colleagues at the University of Michigan regarding their research through MICH (Michigan Institute for Clinical & Health Research).

Vicki Ellingrod
Senior Associate Dean
College of Pharmacy

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
